Humidifiers are designed to add moisture to dry gas by bubbling the gas through water. Strong and durable, the humidifiers listed include a pressure relief valve engineered to activate at 2 or 4 psig. They can be connected to Tri-Tech Medical or other manufacturers oxygen or air flowmeters, or to an oxygen regulator. Humidifiers can also be used with catheters, cannulas or non-breathing masks. Tri-Tech Medical is also pleased to offer a variety of Nebulizers to meet your specifications.
